DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims rejected in the prior office action have been considered but are moot in view of the new ground(s) of rejection. It is noted however that the Japanese reference disputed was supplied by Applicant.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over United States Patent Application Publication 2002/0159703 to McGreer, and further in view of Applicants admitted prior art (figure 9B).

McGreer discloses a arrayed waveguide grating using input parabolic and output tapered slab waveguides having a "parabola" waveguide meeting the equation requirements as claimed (paragraph 21 and 75). However, McGreer fails to explicitly disclose a far-field upper limit of 0.217 and a low limit of 3.14 radians. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use the range limits as disclosed for the most efficient operation of the AWG, since it has been held that where the general conditions of a claim are disclosed in the prior art (McGreers equations), discovering the optimal or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233.

Conclusion

Art Unit: 2883

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
